

"But God commends his love for us, in that, while we were yet sinners, Christ died for us." (Romans 5:8). So if we repent of our sins and trust in Jesus, God will forgive us! Instead of being under judgment "in Adam" we can find acceptance with God "in Christ"! And one day soon, God will make everything like it was "in the beginning...."

"He moves his
tail like a cedar"
Job 40:17

Dinosaurs

Discover the truth about these awesome animals

When were dinosaurs first discovered? Most dinosaur textbooks say they were discovered in 1822 when Mary Mantell came across a large fossil tooth – before long, more fossils were found, and in 1840, the word "dinosaur" (meaning "terrible lizard") was invented.

Could the truth be that dinosaurs were only re-discovered in 1822, that the *first* person to discover dinosaurs was Adam, in the Garden of Eden. The Bible says that "in the beginning", God created "all" the land animals as well as Adam and Eve (Genesis 1:24-25) — and "all" would have included dinosaurs!

But didn't dinosaurs live millions of years before man? **No!** Only people who have a faith called "Evolution" say that, but there's no absolute "scientific" proof. For instance, evolutionists thought the fish *Coelacanth* was a prehistoric kind of "dinosaur fish" living 340 million years ago... until one was caught in 1939! Evolution is a belief, or faith, about the past, just as belief in Creation. "Science" must observe, and no man saw the beginning.

Well, is there any real evidence that dinosaurs lived together with man? Yes! There are many accounts from all over the world: a 6,000-year-old Sumerian account describes a huge dragon; Alexander the Great found people in India worshiping huge cave-dwelling reptiles; China is full of "dragon" legends; the English account of "St George and the dragon"; a 10th century Irish account of a creature resembling a *Stegosaurus*; the 16th century English text *Historia Animalium* lists several animals resembling dinosaurs as still being alive at the time; Australian accounts of the *Bunyip* and other fierce predators; Indian rock drawings which clearly depict dinosaurs (for example in White River Canyon, Utah, U.S.A.); etc... In the Bible a giant plant-eating creature is described, who "moves his tail like a cedar" (Job,40). No animal today has a tail as big as a cedar tree – this

animal sounds like an *Apatosaurus* or *Brachiosaurus*. Another dinosaur is described in Job 41:1-34. Dinosaurs did **not** live millions of years before man.

So what happened to the dinosaurs? It's no mystery. Likely, they simply died out, like so many other species of animals. (Probably, many were unable to survive the harsh conditions after Noah's Flood, Genesis 8, and the Ice Age, Job 38:22-30). Many species would have since been hunted to extinction.

Death **ONLY** entered the world when Adam sinned (it was only after the perfect creation was spoiled that some animals, like T-Rex, became carnivores). "...as by one man sin entered the world, and death by sin..." (Romans 5:12). Sadly, when Adam sinned, he lost his close friendship with God. God's perfect creation was **spoiled** by sin and death. Please answer the following questions: have you ever told a lie? Have you ever stolen anything? If so, by your own admission, you are a lying thief and have broken God's commandments. This is the reason why Jesus came to die for our sins and to be raised from the dead! Instead of judging us for our sins, God took our punishment upon himself!
